## Emergency Plans: Testing and Training A one-day workshop

The majority of companies are aware of their legal obligations to have an emergency plan, to train personnel in the operation of this plan and to test it regularly to validate its effectiveness.

This one-day course will provide delegates with an effective organisational structure to manage a crisis and suggest methods to test, develop and assess the effectiveness of their emergency plans.

### Personnel who would benefit

- Health and safety professionals
- Emergency planners
- Company directors
- Site managers
- Transport /logistics managers
- Members of emergency control centres and incident teams

### Company profiles

- Manufacturers of hazardous products or chemicals
- Warehousing of fuels, chemicals or hazardous products
- Distribution of hazardous products, fuels or chemicals

### Workshop objectives

At the end of the workshop delegates will have a clear understanding of:

- Problems presented by emergencies and how to overcome them
- A generic organisational template for dealing with crisis situations
- The roles of emergency support centres, site main control centres and incident teams
- Transport emergency teams and site incident teams
- The training needs of emergency team members
- The role of emergency services

### Agenda

Steve Napier - CIRCE, Wheldon Road, Castleford, West Yorkshire WF10 2JT

**ICM**  
Integrated Crisis  
Management Ltd

**ICM are providers of emergency plan testing, training, exercises and review**

- The photograph below shows delegates considering their options in a realistic scenario using the ICM flexi-modelling system.
- The model can be used at the client's premises to recreate any site layout.
- It is used in exercises to train emergency teams and test emergency plans.
